concept Recmi INDUSTRIE

Complete solutions

Robotic palletizing, conveyor solutions, pallet handling

RECMI Industrie has built a strong reputation by designing and supplying material handling lines worldwide for the printing industry. Recognized for more than three decades, its comprehensive range of turnkey equipment meets automated material handling needs.

A product to handle...

...A solution to match

Every project is unique. RECMI Industrie develops complete, tailor-made solutions adapted to its customers' production requirements and working environments: tooling suited to the products being handled, and modular, scalable production lines.

Our engineering team places technical and human factors, constraints and production realities at the heart of its analysis and design process. Choosing RECMI Industrie means choosing an easy-to-use solution tailored to your needs.
